

Exclusive Representation in Ontario

Northwest Atlantic (Canada) Inc. Brokerage is pleased to introduce our client Pathways Academy for Children, and announcing both their newest location and their real estate expansion plans across Ontario.

Established in 2001, Pathways Academy offers an award-winning, high quality preschool educational experience ranging from infant child care to senior kindergarten. Each program is designed to ensure education in a safe, secure, stimulating environment and is unlike anything else available in Canada. Ministry certified teachers assess a child's educational needs and an individualized educational plan is created based on the Ontario Curriculum. These comprehensive educational programs are a result of blending the best teaching methods available and are specifically designed to help children develop into their fullest potential and prepare them for a well-balanced, successful future. Full or part-time programs are offered to families who expect an enhanced educational environment to simulate cognitive growth and creativity.

Pathways, in partnership with Northwest Atlantic, seeks to expand their presence in Ontario. Adding to existing units in Ancaster and Burlington, the company's third location will be opening this fall in Richmond Hill. Two more locations are slated for 2009 in the GTA and Ottawa regions and 5 additional locations are being sought for 2010. The type of locations for consideration will be located in affluent communities and located near major commuting corridors. The concept prototypes are 10,500 and 15,500 square feet. Outdoor play areas are an integral and mandatory part of the concept.
